

SAFETY DATA SHEET

according to Regulation (EC) No. 1907/2006 Issue 3 - Revision Date 17.01.2011 Print Date 18.01.2011

1. **IDENTIFICATION OF PREPARATION AND OF COMPANY**

Brand name: RED SEA

Product name: KH / ALKALINITY TEST KIT

Product category: AQUARIUM WATER QUALITY TEST KIT

Product code: R21410

Company: Red Sea Fish Pharm Ltd

Free Trade Industrial Zone

Eilat 88000

Israel

Red Sea Europe

ZA de la St-Denis F-27130 Verneuil s/ Avre

France

Red Sea USA

Houston

TX 77060 USA

18125 Ammi Trail

Telephone: Tel - 00972 9 9567107 Tel - (33) 2 32 37 71 37

e-mail: sharonr@redseafish.co.il info@redseaeurope.com

Company: Red Sea Aquatics

PO Box 1237

Cheddar Somerset

BS279AG

UK

Telephone: Tel - 0203 3711492

e-mail: uk.info@redseafish.com

Tel - 1-888-RED-SEA9

redseainfo@redseafish.com

Emergency No.: As appropriate above

2. **HAZARD INDENTIFICATION**

Classification for supply: Reagent -Classified as being Harmful

Xn, R22

Health / physical hazard : Reagent -Harmful if swallowed

Environmental hazard : None

Physico-chemical hazard: Reagent -May corrode metals and produce flammable vapours

3. **COMPOSITION / INFORMATION ON INGREDIENTS**

Hazardous componentClassificationCAS No.Conc.ReagentEthylene glycolXn - R22107-21-150 - 75%

Classification symbol / letter and R phrases – Refer to section 16 where the full text of each relevant symbol / R phrase is listed

4. FIRST AID MEASURES

General advice: Seek medical advice and show this safety data sheet to attending medical

personnel.

Eye contact: In case of contact with eyes, rinse immediately with plenty of flowing water for at

least 15 minutes, occasionally lifting eyelids and seek medical advice.

Skin contact: After contact with skin, remove any contaminated clothing and wash immediately

with plenty of soap and water. If any irritation occurs after this, seek medical

advice. Wash contaminated clothing before re-use.

Ingestion: Never give anything by mouth to an unconscious person.

Wash out mouth with water and obtain medical attention immediately. Do not

induce vomiting, unless instructed by medical personnel.

Inhalation: If adverse effects (e.g. irritation of airways, drowsiness or dizziness) occur,

remove from exposure, rest and keep warm. Seek medical advice immediately.

5. FIRE FIGHTING MEASURES

Fire and explosive properties: The reagents tend to be water based and are not combustible or explosive.

Suitable extinguishing media: Use extinguishing media suitable to the surroundings such as, Dry Chemical

Powder, Chemical Foam, Water Spray and Carbon dioxide.

Special exposure hazards: When heated sufficiently, product may decompose to form smoke and toxic

fumes, gases or vapours that may cause dizziness. Wear approved self-contained breathing apparatus, protective clothing and prevent contact with skin and eyes. Avoid run-off water from entering drains though the use of barriers or sorbent

materials.

6. ACCIDENTIAL RELEASE MEASURES

Appropriate to size of spillage.

Personal precautions: Refer to section 8 of the safety data sheet for personal protection details.

Avoid contact with skin and eyes. Do not breathe any vapours and keep

unauthorised personnel from the spillage area.

Environmental precautions: Do not allow any liquid to be washed down drains or natural water courses if safe

to do so. Contact authorities, water company, and waste water treatment plant

as appropriate if significant contamination occurs.

Clean-up procedure: In the event of spillage, clean up as soon as possible. Small spills can be mopped

up with a dry cloth or paper tissue. Collect larger spills with sorbent material or mixed with sand then place in a suitable container for disposal as solid waste in accordance with local or national regulations. Wash contaminated surfaces with

water. In the case of a large spill follow prescribed advice in section 6 – "Environmental Precautions" and collect washings for disposal.

7. HANDLING AND STORAGE

Handling requirements: Handle liquids carefully taking care to avoid contact with skin and eyes, and

inhalation of any mists or vapours. When handling large quantities, wear personal protective equipment as described in section 8 and good general

ventilation is recommended.

Storage requirements: Keep only in original container. Avoid large temperature changes and store in a

cool, dry, well ventilated environment way from direct sunlight. Keep containers

closed when not in use.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

During normal non-professional use of the chemical kit no personal protective equipment is required. However, in case of manufacture or spillage, use as appropriate to the size of the spill.

Exposure limit values: Generally not applicable to the packed liquids due to small volumes of liquid being

handled coupled with very short exposure times and packaging type.

Ethylene glycol: 8hr TWA 52mg/m³ (20ppm) (UK EH40 OEL)

STEL 15min 104mg/m³ (40ppm) (UK EH40 OEL)

Exposure controls: None when handling packed liquids in kit form.

For large volumes, good general ventilation is recommended. Where conditions may lead to high airborne concentrations, local exhaust ventilation may be necessary to ensure that workplace exposure limits are not exceeded.

Take measure to prevent: Spillage, skin and eye contact, and ingestion.

Personal protective equipment: For professional use, the need for personal protective equipment should be based

on a workplace risk assessment. Avoid skin contact by wearing chemical resistant gloves (e.g. rubber, neoprene, nitrile) and safety goggles. Where more extensive contact may occur, wear suitable protective clothing (e.g. apron, sleeves and boots). Personal protective equipment should be chosen in consultation with the

manufacturer or distributor of the equipment.

Respiratory protection : Respiratory protection is not necessary if kit is used in accordance with

manufacturer's instructions.

If required, use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU). Where risk assessment shows air-purifying respirators are appropriate, use with multipurpose combination (US) or type ABEK (EN14387) respirator cartridges.

Hand protection: Protective gloves.

The selected protective gloves have to satisfy the specifications of EU Directive

89/686/EEC and the standard EN 374 derived from it.

Eye protection: Face shield and safety goggles.

The selected protective gloves have to satisfy the specifications of EU Directive

89/686/EEC and the standard EN 166 derived from it.

Skin and body protection: Protective clothing; laboratory coat, apron, arm protection etc.

Choose body protection according to the amount and concentration of the

dangerous substance being used.

Hygiene measures: Handle in accordance with good hygiene and safety practices, and wash hands

after use.

9. PHYSICAL AND CHEMICAL PROPERTIES

REAGENT

Odour: None

Appearance: Light orange clear liquid **Flash point (°C)** Not applicable

: Flammability: Liquid is non-combustible

pH: Not determined Oxidising properties: Not applicable

Density: Not determined **Solubility (water):** Completely soluble to give an

acidic solution

Boiling point: Not determined Other:

10. STABILITY AND REACTIVITY

Stability: Reagents stable under recommended storage and handling conditions.

Conditions to avoid: Long term exposure to heat and direct sunlight.

Materials to avoid: Acids, alkalis, oxidising compounds and metals. May produce heat.

Decomposition products: Toxic fumes may be evolved on thermal decomposition.

11. TOXICOLOGICAL INFORMATION

The preparations / reagents have not been tested for toxicological effects. Based on the known effects of the ingredients, the product is classified for human health effects as indicated;

Acute toxicity: The Reagent is classified as being harmful due to the levels present of Ethylene

glycol. Ethylene glycol when ingested can mimic alcohol inebriation followed by nausea, vomiting, abdominal pain, weakness, muscle tenderness, respiratory failure, convulsions, cardiovascular collapse, pulmonary edema, hypocalcemic tetany, and severe metabolic acidosis. Without treatment, death may occur in 8 to 24 hours. Victims who survive the initial toxicity period usually develop renal failure along with brain and liver damage., Exposure to and/or consumption of alcohol may

increase toxic effects.

Corrosivity / Irritation : A compound classified as being corrosive is present at very low concentrations

(<1%) within the **Reagent** and may cause irritation when in contact with eyes and skin. Inhalation may irritate the respiratory system and if ingested, irritation of the

linings of the mouth, troat and gastro-intestinal tract could occur.

Sensitisation: No compounds present in the reagents have been identified as having sensitising

properties.

Repeated-dose toxicity: No compounds present in the reagents have been identified as having repeated-

dose toxicity properties.

Carcinogenicity / Mutagenicity No compounds present in the reagents have been identified as having carcinogenic,

/ Reproductive toxicity: mutagenic or reproductive toxicity properties.

12. ECOLOGICAL INFORMATION

Ecotoxicological data has not been determined specifically for the preparations / reagents, but are not classified as toxic on the basis of the known hazards of components present;

Mobility: Though there is no specific information on the mobility of compounds in the

reagents, they are soluble under normal environmental conditions in water so

would also be expected to be highly mobile in soil.

Persistence and degradability: Compounds present in the reagents would be readily bio-degradable in the

environment.

Bioaccumulation: No information available.

Ecotoxicity: No components in the reagents have been shown to be hazardous to aquatic

organisms.

13. DISPOSAL CONSIDERATIONS

User's attention is drawn to the possible existence of regional or national regulations regarding disposal.

Waste residues: Hazardous residues.

Safe handling of waste product : Landfill or burn in accordance with local regulations.

Disposal of product: According to Special Waste Regulations

EWC (European waste code) recommendation: 16 03 05

16 Wastes not otherwise specified in the lists03 Off specification batches and unused products05 Organic wastes containing dangerous substances

Depending on the origin and state of the waste, other EWC numbers may be

applicable.

Disposal of packaging: According to Special Waste Regulations

EWC (European waste code) recommendation: 15 01 10

15 Waste packaging; absorbents, wiping cloths, filter materials and protective

clothing not otherwise specified.

01 Packaging (including separately collected municipal waste).

10 Packaging containing residues of or contaminated by dangerous

substances.

Depending on the origin and state of the waste, other EWC numbers may be

applicable.

14. TRANSPORTATION INFORMATION

Land transport

RID/ADR hazard classification: 9

Packing group: II

UN No.: UN 3316

Shipping name: CHEMICAL KIT

Maritime transport

IMO – IMDG hazard class: 9

Packing group: II

UN No.: UN 3316

Shipping name: CHEMICAL KIT

Air transport

ICAO/IATA classification: 9

Packing group: II

UN No.: UN 3316

Shipping name: CHEMICAL KIT

15. REGULATORY INFORMATION

EEC labelling information Classified according to CHIP (Chemical Hazard information and packaging)

regulations.

KH/ALKALINITY REAGENT

Hazard symbols : **Harmful**: Xn

Contains: Ethylene glycol

R phrase(s): R22 Harmful if swallowed

S phrase(s): Keep out of reach of children S2

> S7 Keep container tightly closed

S46 If swallowed seek medical advice immediately and show this container or

label.

Other regulatory information:

16. OTHER INFORMATION

Nature of revision: Web site address updated and contact details changed in Section 1.

Based on EC directive: The classification of this product has been assessed according to the

> calculations given in 99/45/EC and its amendments, and regulation (EC) No.1272/2008 on classification, labelling and packaging of substances and mixtures on the basis of available information for the ingredients from supplier safety data sheets and the Existing Chemical Substances Information System

found on the European Chemical Bureau website;

http://ecb.jrc.ec.europa.eu/esis/.

Relevant R phrases used in Harmful Xn

> section 3: R22 Harmful if swallowed

Usage advice: This safety data sheet is provided to enable the employer / user to fulfil his

duties to assess and provide information on risks in the work place as required

under regional health and safety legislation.

Read accompanying information, use only in accordance to manufacturer's

instructions.

Recommended uses / To measure semi-quantitatively the Temporary Hardness / Alkalinity levels in

restrictions: aquarium water.

Other information: The above information is believed to be correct but does not purport to be all

inclusive and shall be used only as a guide. This company shall not be held liable for any damage from handling or from contact with the above product.
